Recycling is Our Way Of Life

Printed on 30% Recycled Paper

Who We Are...

- Navy Whidbey Recycle is the Navy's premier **recycle collection and processing facility**. Since 1990, it has saved NAS Whidbey well over \$10 million in trash disposal costs, and today reclaims more than 80% of the NAS Whidbey Island waste stream.

- Navy Whidbey Recycle is also an industry leader in the area of **in-vessel composting**, generating high quality compost at its off-site composting facility, in operation since 2001.

Why Recycle?

Recycling...

- *Saves money by avoiding the ever-increasing expense of trash disposal*
- *Reduces pollution by easing the burden on our nation's landfills*
- *Conserves natural resources and saves energy by reusing already refined raw materials*
- *Is easy...and, in many cases, more convenient and cheaper than throwing something in the trash*

What We Accept...

• **Plastic Products...**

There are currently nine different types of plastics available for industrial use. Of those, we accept all types except Styrofoam chunks and preformed containers, cups or plates...

You can easily identify the type of plastic by looking for the recycle symbol with the corresponding number inside imprinted on the material.

• **Cardboard...**

We accept both corrugated (the kind with ridges -- moving boxes, etc.) and non-corrugated cardboard (flat style box board – found as cereal boxes, soda boxes or dry food boxes, etc.)

• **Paper Products...**

We accept virtually any kind of paper you can think of...white, colored, newspapers, bagged shredded paper, books (including phone books), magazines – even junk mail!

We also accept the poly-coated paperboard containers such as milk & juice cartons, drink boxes, etc.

• **Aluminum Products...**

Beer & soda cans, foil, TV dinner trays, aluminum cookware, and glass bottle twist off caps are among the many aluminum products we accept.

• **Other Metal Products ...**

Tin cans, scrap aluminum, steel, copper, brass, iron...we take it all! We also take old lawn mowers, bike frames, grills, engines...anything that's made of metal we will gladly take off your hands!

• **Glass Products...**

Container Glass (bottles and jars) only! We cannot accept flattened or "tempered" glass (i.e. mirrors, windows, glass trays, vases, tabletops, etc.) .

• **Other Items...**

We also take used oil filters, lead acid car batteries, and gently used clothing.

What We Don't Accept...

- *Household hazardous waste, scrap wood, furniture, carpets and rugs, pressurized containers (propane tanks, etc.), used oil or oil products.*
- *We do not accept computer monitors or televisions but we know who does!*

Remember...

- Please **sort** recyclable materials according to type (and glass according to color – clear, green or brown).
- Please **clean or rinse** out containers and flatten cardboard whenever possible.

If you need to know if something can be recycled (or if you need assistance), please call our customer service number at 257-5481.
