2016 Comprehensive Plan Update
Project Goals

The following goals are intended to guide the development of a detailed work plan for
the completion of the 2016 Comprehensive Plan update.

1. Review and update the Comprehensive plan and development regulations by
   June 30, 2016 and address all mandatory GMA requirements.

2. Review and update the County’s critical areas regulations by June 30, 2016 and
   incorporate Growth Management Act (GMA) compliant strategies for meeting the
   needs of agricultural activities.

3. Develop and adopt regulations to implement the existing Freeland Subarea Plan.

4. Facilitate a plan to provide sewer service throughout the Freeland Non-Municipal
   Urban Growth Areas by 2036 and amend Freeland Subarea Plan and Freeland
   sewer plan as necessary to ensure that land use plans are consistent with the
   availability of urban services.

5. Conduct a code “cleanup” to correct inconsistencies, vague requirements, and to
   make the code more user-friendly.

6. Reformat and reorganize the Comprehensive Plan to improve clarity and
   readability.

7. Carry out a targeted public outreach effort in each planning area to identify public
   concerns and priorities for managing rural land uses. Use the results of this effort
   to inform changes to the Comprehensive Plan and development regulations.

8. Additional outreach and coordination with Clinton community and other
   commercial RAIDs. Based on the results of this effort develop a policy framework
   to guide future work.

9. Review and update Historic Resources Element for consistency with current
   historic preservation code requirements by working with relevant community
   partners.

10. Establish an abbreviated Economic Development Element by identifying existing
    sources of information, the roles and responsibilities of existing economic
    development agencies, and areas where more information or analysis is needed.
    Include a schedule and procedures for drafting a more Comprehensive Economic
    Development Element.
